

IMS POLICY

VISION

To be leading engineering and constructing company.

MISSION AND VALUES

Basic principles for the realisation of engineering services are:

- We make plans for the future of our company and implement the plans in accordance with sustainable development principles, promoting these principles to our clients and partners worldwide.*
- We respect our clients and partners, employees and the environment we work in, our shareholders and community.*
- We apply the latest technologies and know-how, we continually improve and innovate our work process. We strive to achieve quality in the best possible way.*
- Accident prevention and care for health & safety is our priority.*
- We are committed to environmental protection in all aspects and as a company operating in the area of construction of energy facilities, our activities also include the improvement of our own energy efficiency.*
- We are aware that in today's world, information is one of the main resources and that is why we pay special attention to its safety.*
- We respect legal requirements and strive to contribute to poverty alleviation and general community development.*
- We encourage teamwork, openness and confidence and we value the knowledge based on diversity of background, experience and opinion.*
